about **MEDSOL** Diagnostics

“ **WHATEVER DIAGNOSTIC SERVICE
YOU NEED, YOU CAN RELY ON MEDSOL** ”
‘Science at your Service’

Medsol Diagnostics is a part of Gulf Healthcare International. It is a specialist Laboratory and Radiology network, currently spread across 15 locations throughout the Middle Eastern region.

800 medsol
www.medsol-diagnostics.com

We are the leading network of this kind, providing efficient and reliable solutions for doctors, hospitals and private healthcare providers who require a broad range of diagnostic testing and health screening services.

We help ensure accurate and timely diagnosis, informing appropriate treatment decisions, better healthcare and improved clinical outcomes. Our state of the art diagnostic machinery, expert technicians and dedicated laboratory practices will ensure that results are always delivered quickly and accurately.

We pride ourselves on strict adherence to clinical best practice. In fact, we are the only laboratory network with a dedicated, full time Quality Assurance Manager. Our laboratories not only comply with strict regional health authority regulations, but also were the first network to initiate the accreditation process in the UAE. Thus we are also accredited through stringent international bodies such as JCI USA, Joint Commission International and ISO, the International Organisation for Standardisation. The highest standards of inter-laboratory Quality Control ensure that each and every result reported in every one of our laboratories is accurate and reproducible again and again.

Finally, we are dedicated to providing all of our services, not only to the highest professional standards, but also in a caring and personal fashion that will make your patient's experience a comfortable, reassuring and supportive one.

our Services

“MEDSOL DIAGNOSTICS HAS A HUGE
RESERVE OF TECHNICAL EXPERTISE.”

Every Medsol Diagnostic Laboratory is headed by a highly competent laboratory director whose academia include; Specialist Pathologist, Specialist in Molecular Diagnostics, Specialist Microbiologist, Specialist Pathologist and Histopathologist.

800 medsol
www.medsol-diagnostics.com

MEDICAL PATHOLOGY

Our services include clinical pathology, immuno - and general haematology, endocrinology, immunology, serology, microbiology, histopathology and cytopathology, providing a **‘one-stop shop’ for approximately 90% of pathology requirements.**

Our Test Menu offers over 600 tests, using state-of-the-art medical equipment, and we are committed to providing accurate results within hours.

With an efficient specimen pick-up service, you can be certain that your results will be processed and delivered on time. All our messengers are professionally trained in the important aspects of sample collection: sample quality and quantity, sample type, and sample temperature (frozen, refrigerated and ambient).

We can even offer a home visit service, ensuring that the pathology tests you need can be undertaken even if your patient is unable to attend a centre in person. If you need more esoteric profiles - in immunology, molecular genetics, chromosomal analysis and specialised histopathology - we have trusted referral laboratory associations in Europe, India and the USA.

All our results are supported by quality processes carried out to rigorous international Accreditation standards.

our Services

RADIOLOGY

Our imaging departments offer a total service, ranging from paediatric radiology and neuro-radiology to general diagnostic radiology. Our centres use the latest digital picture-archiving communication system to analyze, manage and store digital images.

800 medsol
www.medsol-diagnostics.com

Importantly, our radiology team is trained to give maximum care and support to patients during their examination.

our Services

LABORATORY MANAGEMENT SERVICES

Medsol Diagnostic Laboratories provide laboratory management systems within hospital and regional healthcare systems. We are the only laboratory group to run and manage the laboratories of both the leading private hospital and a University Hospital in the UAE.

800 medsol
www.medsol-diagnostics.com

Our services support hospital administrators and medical staff in achieving and maintaining excellence in their laboratory services.

We offer:

- A full range of routine testing
- Collection and transportation support
- Day-to-day operation and complete management
- Patient Results On-line (PRO)
- Point of Care Testing (POCT)
- Quality Assurance Programme

CORPORATE MEDICAL SERVICES

We can meet all of a company's healthcare requirements.

For example:

- Pre-employment check-ups for staff, senior executives and offshore employees
- On-site medical services
- All types of vaccinations and related certificates
- Special discounts for insurance card holders on excluded services
- Free seminars and regular health days if required, to educate staff about key health issues and raise general health awareness.

other Services

Franchisee Laboratory Management

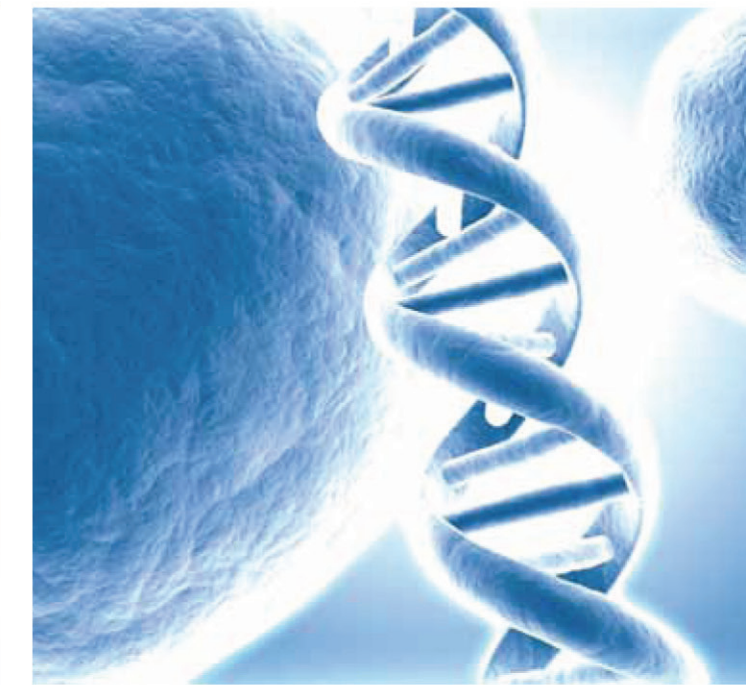

**Research Projects for Universities –
offering the Esoteric Tests Requirement for the Region.**

**A Continual Programme of Investment in the latest
Scientific and Technology Developments**

800 medsol
www.medsol-diagnostics.com

We take cognisance
of the medical
fraternity's testing
requirements and
pro-actively source
and introduce the
latest technologies
and tests to fulfil
them.

Recent introductions include

- Gamma Interferon for TB testing
- PCR for HPV

Our next investments will include:

- Newborn Screening (Tandem Mass)
- PCR for HBV, HCV etc
- Heavy Metal Testing for industrial sectors

other Services

SCIENTIFIC INTERACTION WITH OUR MEDICAL COLLEAGUES

Medsol Diagnostics is the first laboratory network to actively undertake a mutually beneficial programme of scientific interaction with the medical fraternity.

800 medsol
www.medsol-diagnostics.com

This includes:

- Regular scientific seminars to update the medical fraternity on the latest advances in the field of pathology
- Circulation to the medical fraternity of new research and study papers on pathology
- Updates on the latest test introductions, and the technicalities associated with them
- Discussing pathology tests when requested by a medical professional, to help arrive at a final diagnosis and ensure better treatment/management of a disease

EXCEPTIONAL STANDARDS OF CARE

We pride ourselves on our exceptional standards of patient care. We have the benefit of being a multicultural company, with a close-knit, dedicated team drawn from over 15 different nationalities. All are highly-trained, experts in their field, and encouraged to take every opportunity for professional growth and personal development. All are dedicated to making your patients' experience as reassuring and supportive as possible. Our facilities, too, are designed with patient comfort and care as a major criterion.

At any Medsol Diagnostic Laboratory, you can rely on your patients receiving efficient service, helpful advice, respect, support and care, as well as the highest standards of medical expertise.

Facilities

At Medsol Diagnostics, we set our sights high

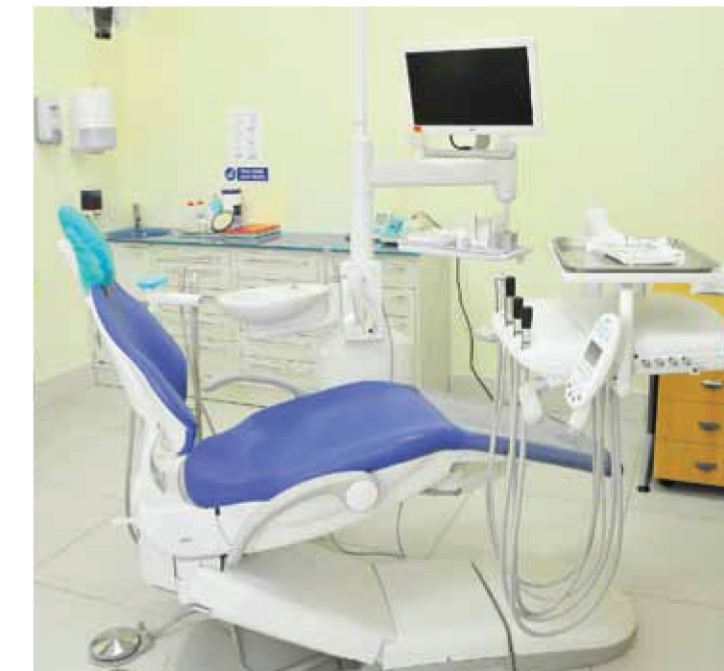

Our aspirations are clearly focused on becoming the Doctor and patient's choice for quality, accurate diagnostic testing with fast turn-around times.

800 medsol
www.medsol-diagnostics.com

THE MEDSOL DIAGNOSTICS FACILITIES

One of Medsol Diagnostics philosophies is strict adherence to clinical best practice, which is why we accredit our laboratories through stringent international bodies such as JCI USA, Joint Commission International and ISO, the International Organization for Standardization, as well as comply with strict regional health authority regulation.
